to have exceeded current liabilities \$1,-380,929.

Among its assets Utah had accounts receivable, \$114,158; supplies and fuel, \$311,859; cash in bank, \$91,121. Its equity in copper was \$2,171,374, against which, however, \$800,000 had been already advanced.

Of the \$5,250,000 first mortgage bonds but \$7,500 remained outstanding. The company has accounts payable of \$45,490; treatment charges not yet due amount to \$381,406, while the company owes the National Bank of Commerce \$197,964. This amount represents a book overdraft caused by the books of the company having been held open in order to include certain money received and disbursements made subsequent to December 31, 1909. Last year \$537,014 was expended in steam shovel stripping, \$214,193 in acquiring rights of way and railroad construction, while dumping rights and general expenses absorbed \$59,533, bringing the total up to \$810,740. The total amount expended in this way since operations commenced, less the amount charged to operations, has been \$1,515,947.

Lewisohns Drop Iron Dyke Deal on the Snake River.

What may develop into a deal for the shipment of iron ore from the immense deposits in the Iron Dyke mine near Baker City, Ore., for use at the United States smelter, to take the place of the fluxing ore formerly received from the Raymond-Eureka mine at Eureka, Nev., is now in progress at Baker City, according to the latest information from that place. The mine at Eureka was shut off by the recent washing out of the railroad from Eureka to Palisade. It is understood that
J. H. Eardley, representing the United
States Smelting, Refining and Mining
company, is in Baker City conferring
with Frank Pearce, who represents the
Pennsylvana people owning the mine.
It is understood that the mine can
produce any quantity of iron ore, and
for that reason the Lewischns of New

Last fall it was announced that the Lewischns had purchased the controlling interest in the property, which is held by Erie, Pa., people. Further than that, it is declared that \$400,000 was put up to show good faith in the deal, after the property had been fully examined by W. B. Fisher, manager of the Salt Lake Copper company, a Lewischn interest at Tecoma, Nev. at Tecoma, Nev. No agreement could be reached, as

No agreement could be reached, as the Pennsylvania interests were unwilling to let go of control under the terms made. It is said that they did not believe that they could, under the agreement, receive the returns they desired on the amount of money they had invested. The Lewisohns would not consent to putting up the money for the smelter, secure the contracts from the various mine owners of the region, and carry the burden of the affair and pay the amount that the stockholders asked.

According to Mr. Pearce, the Erie stockholders in the property have been figuring on putting in a smelter of their own, which would handle the ore of that region. This was prior to the appearance of the Lewisohns. Since then their plans have simply been held in abeyance. It is now probable that they will start something in their own way.

MARKET LETTERS.

The following market letters were received over Badger Bros., brokers, private wire yesterday:

New York, April 28.—The curb market closed weak, very little commission business. A sharp attack on Ray Central drove it down 21 at the close. Look for lower prices. Sixty-five thousand that all persons interested appear before the said court to show cause why an order should not be granted to sell an order sho

New York, April 28.—Today's stock market was full of heavy liquidation, not only by important interests, but by commission houses generally. There was no news on the situation here, other than the money, with call rates as high as 7 per cent in the afternoon, loans were called freely, which accounted for much pool selling. The market was distinguished during most of the day by a lack of substantial support except possibly in the late dealings. Whatever bull factors existed were entirely ignored by the avalanche of selling and any favorable conditions were construed in the bear sense by the large professional contingent.—Swain.

BIG NEBO NEARING ORE.

Expect to Open Vein in Next Twenty Feet.

(Special to The Herald-Republican.) (Special to The Herald-Republican.)
Provo, April 28.—W. F. Giles and Manager W. D. Rawson of the Big Nebo Mining company, whose property is in the Nebo district, have returned from an inspection of the mine, with good encouraging reports for the stockholders. The tunnel, which is being driven to reach the vein, is now in 330 feet, and the estimate is that in about 20 feet more the vein will be opened. The whole face of the tunnel is now in a cre-bearing lime.

The whole face of the tunnel is now in ore-bearing lime.

A prospect shaft has been sunk 80 feet on the vein, which the tunnel will reach, and over six feet of high-grade lead-silver ore was found in the shaft, which makes it certain that the tunnel will strike it. When the strike is made, shipments can begin at once, as the tunnel is easy of access from the wagon road leading to the railroad at York, three miles away. From all in-York, three miles away. From all indications the company expects to be shipping ore inside of two weeks.

Twelve Months.

Reno, April 28.—The report of J. H.
Haley, state license and bullion tax agent, on the mineral production of Nevada for the year ending December 31, 1909, has just been forwarded to Governor Dickerson, and shows the immense strides in mining in Nevada in the last twelve months.

The production in tonnage is two and a half times that of 1908, and the total value nearly twice that of 1908. The tonnage has increased from \$16,525 to 2,906,825 tons; the value increased from \$114,373,545 to \$24,969,531; taxes collected increased from \$101,656 to \$224,579; expenses increased from \$12,259.871 to \$20,033,947.

White Pine county leads the state in gross production, having produced 1,678,895 tons. Esmeralda county follows, with the richer metals, having 509,801 tons. Esmeralda leads in values for the year, with \$9,587,831. White Pine's copper follows with \$7,114,354.
